

Lyra Therapeutics to Present at Jefferies Healthcare Conference

June 2, 2023

WATERTOWN, Mass., June 02, 2023 (GLOBE NEWSWIRE) -- Lyra Therapeutics, Inc. (Nasdaq: LYRA), a clinical-stage biotechnology company developing innovative therapies for the localized treatment of patients with chronic rhinosinusitis (CRS), today announced that Maria Palasis, Ph.D., President and Chief Executive Officer, will present at the Jefferies Healthcare Conference in New York, NY on Wednesday, June 7, 2023, at 10:30 a.m. ET.

A live webcast of the presentation will be available on the Investor Relations section of the Company's website at investors.lyratherapeutics.com. A replay of the webcast will be available for 30 days following the presentation.

About Lyra Therapeutics

[Lyra Therapeutics](https://www.lyratx.com), Inc. is a clinical-stage biotechnology company developing therapies for the localized treatment of patients with chronic rhinosinusitis (CRS). Lyra has two investigational product candidates, [LYR-210](#) and [LYR-220](#), in late-stage development for CRS, a highly prevalent inflammatory disease of the paranasal sinuses which leads to debilitating symptoms and significant morbidities. LYR-210 and LYR-220 are bioresorbable nasal implants designed to be administered in a brief, in-office procedure and are intended to deliver six months of continuous mometasone furoate drug therapy (7500µg MF) to the sinonasal passages. LYR-210 is designed for surgically naïve patients and is being evaluated in the ENLIGHTEN Phase 3 clinical program, while LYR-220, an enlarged implant, is being evaluated in the BEACON Phase 2 clinical trial in patients who have recurrent symptoms despite having had prior ethmoid sinus surgery. These two product candidates are designed to treat the estimated four million CRS patients in the United States who fail medical management each year.
