American Academy of Otolaryngology–Head and Neck Surgery (AAO-HNS) 2024 Annual Meeting

Title: *LYR-220 24-Week Steroid-Eluting Sinus Insert Improves Smell and Sleep in Patients with Chronic Rhinosinusitis*

Presenting Author: Zachary M. Soler, MD, MSc, Medical University of South Carolina, Charleston, SC

Date and Time: Sunday, September 29th at 1:06 p.m. ET

Session: Rhinology/Allergy (1:00 – 2:00 p.m. ET)

About Lyra Therapeutics

[Lyra Therapeutics](#), Inc. is a clinical-stage biotechnology company developing long-acting, anti-inflammatory sinonasal implants for the treatment of chronic rhinosinusitis (CRS). Lyra Therapeutics is developing therapies for CRS, a highly prevalent inflammatory disease of the paranasal sinuses which leads to debilitating symptoms and significant morbidities. LYR-210, the company's lead product, is a bioabsorbable nasal implant designed to be administered in a simple, in-office procedure and is intended to deliver six months of continuous anti-inflammatory drug therapy (7500µg mometasone furoate) to the sinonasal passages for the treatment of CRS with a single administration. LYR-210, being evaluated in the ENLIGHTEN Phase 3 clinical program, is intended for patients with standard anatomy, primarily patients who have not undergone ethmoid sinus surgery. The company's therapies are intended to treat the estimated four million CRS patients in the United States who fail medical management each year.
